

Drive your business faster with specialist vehicle inspection and mobile solutions

autocheck vehicle inspection solution

Benefits Realised

- Lower overheads through reduced manual processes
- Increase productivity through more efficient job allocation
- Increased visibility of key operational processes
- Improved accuracy and reduced errors through menu driven inspection templates
- Improved customer service by automated report delivery and online web tools
- Reduced stock holding times through automatic upload to your auction or DMS system
- Pre-marketing of vehicles before arrival onsite.
- Increased damage recharging through improved tracking of existing and new damage

AutoCheck has been specifically designed for the automotive industry and provides the tools to improve productivity and customer service. AutoCheck is helping the following industries:

Lease / rental companies

Increase turnaround times, improve customer service and optimise availability of stock by getting a faster, more complete picture of the state of return vehicles.

Vehicle auctioneers / remarketers

Move vehicles to listing faster, improve the consistency of valuations and increase the speed of your marketing by collecting and processing vehicle information as soon as its hits the floor.

Dealerships / car supermarkets

Reduce stock holding times, achieve more consistent pricing and get vehicles ready for the lot faster by being able to assess a vehicle quickly and retrieve all the historical data required.

Automotive inspection services

Make it easier for your customers to use your service, increase the efficiency of the inspection process and respond to new market opportunities faster by giving inspectors productivity tools and giving customers direct web access to booking systems and reporting.

Transport services

Lower damage claims and improve the efficiency of your vehicle handling by processing vehicles quickly for transport, and clearly and reliably identifying any damage pre and post pickup.

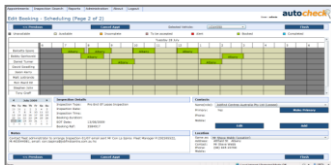

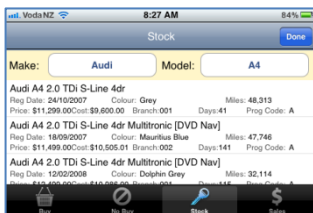

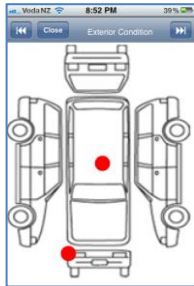

Netresult Mobility provides mobile computing solutions to help all parts of the vehicle supply chain, from wholesale financiers right through to consumers, improving the speed and quality of their decisions about vehicles.

We pride ourselves on providing innovative and efficient solutions to the automotive industry. Whether it's a turnkey or bespoke solution, our development is carried out in consultation with our customers. We understand your business and develop solutions to meet your needs. Our mobile solutions are aimed at addressing inefficiencies and providing you with competitive advantage. We adopt a low risk approach to developing and providing solutions by only using proven technology and 'best practice' project management methodologies

Drive your business faster with specialist vehicle inspection and mobile solutions

Damage tracking

- Vehicle images and photos used to indicate location and severity of damage
- Vehicle images for all common vehicle types, sedans, wagons, coupes, and motor bikes
- Automatically load existing damage from the previous inspection making it easier to identify new damage
- Fully configurable inspection templates, damage descriptions, and repair price menus

Buying and valuation tools

- Integrated with CAP, Glass's, and Redbook vehicle description and valuation databases
- Buyers able to view current stock, sales history, and buying requirements direct from the PDA.
- Valuation adjustments based on mileage, damage, and vehicle features
- Integrated with encumbrance services such as Experian, HPI, and Revs

Appointment management

Note an appointment is not required to start an inspection

- Automatic appointment allocation based on inspector availability, skill, and proximity
- Options to allow your customers to search and confirm appointments online 24/7
- Management dashboard to track appointment progress.

Integration & reporting tools

- Integrate with your DMS or auction system for automatic upload of vehicle details
- Automatically deliver completed inspection reports via email or fax
- Notification services for automatic requests to third party suppliers e.g. transportation services
- Comprehensive management reporting including productivity and trend analysis
- Customisable inspection report templates
