

Drive your business faster with specialist vehicle inspection and mobile solutions

Benefits

- Faster, more efficient audits
- More timely results – audit results are sent / received wirelessly in 'real time'
- More accurate information – manual processes / illegible hand writing are removed from the audit process
- Powerful management information – easy analysis of trends, exceptions and performance measures
- Powerful management information – easy analysis of trends, exceptions and performance measures

Driving your compliance auditing processes faster

Do you experience delays in finalising your audits captured in the field

Do you have trouble managing and tracking the issues recorded during an audit

Do you experience delays in extracting management reports and completing trend analysis

Netresult's Mobile Auditor Compliance solution is aimed at businesses that have a need to carry out regular or targeted audits of facilities, venues and operations to ensure compliance with standards.

The audit is driven by a user configurable template and allows for the scoring of the results. A PDF report is generated at the end of the audit and can be emailed to the operation being audited as well as other interested parties. Issues are generated on the back end server which can be tracked and closed.

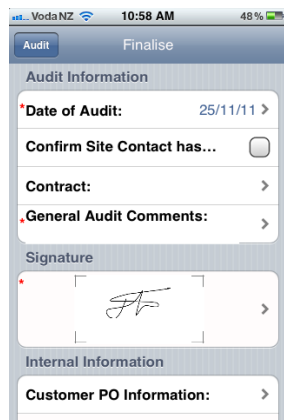

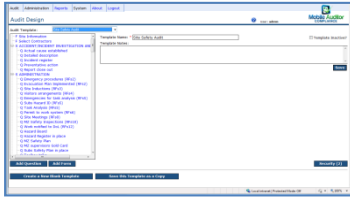

Organisations like SiteSafe New Zealand and Tabcorp Australia are using Mobile Auditor to improve their auditing processes.

We pride ourselves on providing innovative and efficient solutions, whether it's a turnkey or bespoke solution, our development is carried out in consultation with our customers. We understand your business and develop solutions to meet your needs. Our mobile solutions are aimed at addressing inefficiencies and providing you with competitive advantage. We adopt a low risk approach to developing and providing solutions by only using proven technology and 'best practice' project management methodologies.

vehicle inspection and mobile solutions

Flexible template design

- Centralised question library to re-use across multiple audit templates. Modifications to questions only have to be made in one place.
- Build your own data capture forms and include them in one or more audit templates.
- Build a library of standard statements that can be selected by the auditor in the field. Reduces the amount of typing the auditors have to do in the field.

Flexible auditing module

- Audit template locked at time of starting the audit
- Immediate view of the issues created on the previous audit
- Complete you audits on iPod Touch, iPhone, or iPad
- Visual indicators on audit progress and the issues created.
- Signature capture and timesheet options or automated billing

Audit and issue management

- View and management the status of the audit from web module
- Authorise the release of the audit results to your customer
- Provide access to your customers to login and review their results and issues
- Drill into the audit issues and workflow the tasks to resolve

Audit & management reporting

- Audit report immediately available once the audit is complete
- Automatically deliver the audit reports to your customers on completion
- Flexible management reporting options available to report on audit and issue trends
- Dashboard reporting available to focus on key KPI's
